P2 LEVEL 3 SURGICAL DISPOSABLE RESPIRATOR

KEY TECHNOLOGY

- Proprietary Foam Nose Seal
- 3 Panel Construction
- Fluid Resistant Level 3 160 mmHg
- Low Breathing Resistance Filter

FEATURES

- Advanced multilayer technology providing protection against mechanically and thermally generated particulates including: fluids, dusts, mists, fumes and smoke
- Three panel design provides structural integrity, form fit seal and optimal comfort. All three mask panels and seams have been independently tested and pass AS 4381:2015 – ISO 22609
- Bacterial Filtration Efficiency (BFE) >99%
- Fluid protection level 3, 160 mmHg
- Proprietary adjustable foam nose pad to ensure consistent optimum facial seal and reduce fogging of eyewear
- Versatile unisex fit suitable for a vast range of facial shapes and sizes. Effective for many "hard to fit" individuals
- Specialised TRIDENT™ respirator seal attains exceptional consistent PortaCount® fit testing results
- Low breathing resistance maximising wearer comfort, durability and life of product
- Designed to be used in conjunction with other mandatory personal protective equipment
- Latex free
- Each mask is individually batch numbered and packaged for the ultimate in traceability, portability and hygiene

Part No: **RTCFFP2**

AREAS OF APPLICATION

- Particulate Filtration
- Bacterial & Fluid Protection
- Personal Hygiene & Safety

PACKAGING

1 mask per bag
20 masks per inner
480 masks per carton

Carton Dimensions:
630 x 250 x 580mm
Gross Weight: 7.8kg
Net Weight: 4.5kg

STORAGE

40°C
-20°C
<90%
