Compostable Bin Liners

Kwikmaster Compostable Bin Liners are a sustainable alternative to traditional virgin/recycled plastic or oxo-degradable bin liners. Made from plant-based material, they are 100% GMO free and can be disposed of in home or commercial composting or in landfill. If composted, these bin liners will breakdown and become fertiliser – while leaving no microplastics behind.

CODE	DESCRIPTION	SIZE	BAGS PER ROLL	CARTON QTY
KW27COM	Compostable Bin Liners	27L	20 Bags	400 Bags (20x20 Rolls)

KW140COM	Compostable Bin Liners	140L	5 Bags	100 Bags (5x20 Rolls)
KW240COM	Compostable Bin Liners	240L	5 Bags	120 Bags (5x24 Rolls)

Kwikmaster Compostable Bin Liners are made from a blend of random copolymer polybutylene adipate terephthalate (PBAT), polylactic acid (PLA) and corn starch. This makes them a high quality, compostable and plant-based alternative to traditional plastic bin liners. These compostable bin liners are available in a variety of sizes to suit any businesses needs and are standards in accordance with Australian/NZ home and commercial compostable standard AS5810 and AS4736.
