SUSCSC99/3	Sugarcane Clamshell, 3-Compartment, White	9 x 9"	Carton of 200	

Made from Renewable Sources

Sustain Sugarcane Clamshells are made from sugarcane pulp (bagasse). Bagasse is the fibrous residue left over after the sugarcane has been crushed and the sugar extracted.

The finished product is strong, water resistant and more importantly, made from renewable sources.

Compostable

Compostable products will breakdown into nutrient-rich organic matter which can be used as a fertiliser for plants.

Sustain Sugarcane Clamshells are certified compostable in industrial facilities so will breakdown under specific conditions.
